DETAILED MATCH ANALYSIS

Round 16 | Gabba | 2026-06-25

Brisbane Lions vs Sydney

MEDIUM CONFIDENCE

TIP: Sydney

52% win probability approx. 2pt margin

Brisbane Lions \$1.93 (51.9% implied) | Sydney \$1.89 (52.8% implied) | Line: Sydney Swans giving 0.5 pts

PREDICTED WINNER: Sydney

WIN PROBABILITY: Brisbane Lions: 48.5% | Sydney: 51.5%

The win probability is driven by a weighted blend of the betting market (40% weight), Squiggle model (30% weight), and form data (30% weight), with the Squiggle model's prediction of a Sydney win and the market's implied probability of a Sydney win (52.8%) being the primary drivers.

PREDICTED MARGIN: ~2 points

The predicted margin is anchored to the line market, which implies a Sydney win by 0.5 points, and the average scoring margins of the two teams, with Sydney's average margin over the last 5 games being +19.6 points and Brisbane's being -15.6 points.

KEY FACTORS:

- Sydney's strong recent form, with 4 wins in their last 5 games, and an average score of 105.6 points for and 86.0 points against over the same period.
- Brisbane's inconsistent form, with only 2 wins in their last 5 games, and an average score of 92.6 points for and 108.2 points against over the same period.
- The home ground advantage, with Brisbane having a 50% win rate at home this season and Sydney having a 67% win rate away from home.
- The head-to-head record between the two teams, with Brisbane having a 71% win rate over the last 7 meetings, but Sydney having won the most recent meeting.

SCORING TRENDS ANALYSIS:

Brisbane's last-5 average is 92.6 points for and 108.2 points against, while their last-3 average is 99.7 points for and 86.0 points against. Their attack is stable, while their defence is tightening. Sydney's last-5 average is 105.6 points for and 86.0 points against, while their last-3 average is 122.3 points for and 82.7 points against. Their attack is improving, while their defence is stable. Sydney's scoring profile gives them an advantage due to their high average score and improving attack.

HOME GROUND ADVANTAGE:

Brisbane has a 50% win rate at home this season, while Sydney has a 67% win rate away from home. At the Gabba, Brisbane has a 61% win rate historically, while Sydney has a 46% win rate. The estimated point value of home advantage for this match is around 8-10 points, based on the historical data.

MARKET & MODEL ANALYSIS:

The head-to-head market implies a 50-50 chance of either team winning, while the line market implies a Sydney win by 0.5 points. The Squiggle model predicts a Sydney win by 0.6 points. The market and model are in agreement, with the Squiggle model being weighted more heavily due to its strong track record.

FATIGUE & TRAVEL IMPACT:

Both teams have had a similar amount of rest, with Brisbane having 11 days rest and Sydney having 12 days rest. Sydney has to travel to Brisbane, but the travel time is relatively short (1h30m flight). Fatigue is not a significant factor for this match.

WEATHER IMPACT:

The forecast is for a maximum temperature of 20°C, with a 61% chance of 0.5mm of rain and a wind of 17 km/h. The conditions are expected to be slightly slippery, which may reduce kicking accuracy, but they do not significantly favour one team over the other.

TEAM NEWS IMPACT:

There is no relevant team news available for either team, so the impact is neutral.

CONFIDENCE: Medium

The data sources are generally in agreement, but there is some uncertainty due to Brisbane's inconsistent form and the head-to-head record between the two teams.

UPSET RISK: Medium

The upset risk is supported by Brisbane's strong head-to-head record against Sydney, with a 71% win rate over the last 7 meetings, and their ability to perform well at the Gabba, with a 61% win rate historically.

DATA CONFLICTS: None identified.

Round 16 | MCG | 2026-06-26

Hawthorn vs GWS Giants

MEDIUM CONFIDENCE

TIP: Hawthorn

62% win probability approx. 10pt margin

Hawthorn \$1.35 (74.2% implied) | GWS Giants \$3.24 (30.8% implied) | Line: Hawthorn Hawks giving 17.6 pts

PREDICTED WINNER: Hawthorn

WIN PROBABILITY: Hawthorn: 62% | GWS Giants: 38%

The probability is driven by a weighted blend of the betting market (40% weight), form data (30% weight), and scoring trends (30% weight), with the market's implied probability of 74.2% for Hawthorn adjusted downward due to the Giants' strong scoring average and the Hawks' inconsistent recent form.

PREDICTED MARGIN: ~10 points

The predicted margin is anchored to the line market of 17.6 points and adjusted downward based on Hawthorn's average margin of +6.4 points over the last 5 games and GWS Giants' average margin of +15.8 points over the same period, suggesting a closer contest than the market expects.

KEY FACTORS:

- Hawthorn's significant home ground advantage, with a 29pp higher win rate at home (86% vs 57%), which could be worth around 8-15 points.
- GWS Giants' short turnaround of 6 days, which may lead to fatigue and impact their performance, given their recent high-intensity games.
- Hawthorn's improving attack trend (^) and stable defence trend, which could give them an edge in scoring, especially at home.
- The head-to-head history between the teams, with Hawthorn having a 38% win rate over the last 8 meetings, but a more even recent record.

SCORING TRENDS ANALYSIS:

Hawthorn's last-5 average is 91.8 points for and 85.4 points against, with a last-3 average of 101.0 points for and 80.3 points against. Their attack is trending up (^) and defence is stable. GWS Giants' last-5 average is 101.8 points for and 86.0 points against, with a last-3 average of 90.7 points for and 84.7 points against. Their attack is trending down (v) and defence is stable. Hawthorn's scoring profile gives them an advantage due to their improving attack and home ground advantage.

HOME GROUND ADVANTAGE:

Hawthorn's home win rate is 86% (6/7) and away win rate is 57% (4/7), while GWS Giants' home win rate is 71% (5/7) and away win rate is 14% (1/7). At the MCG, Hawthorn has a historical win rate of 56% (234W-186L) and an average margin of +6.5 points, while GWS Giants have a historical win rate of 31% (10W-22L) and an average margin of -20.7 points. The estimated point value of home advantage for this match is around 10-12 points.

MARKET & MODEL ANALYSIS:

The head-to-head market implies a 74.2% chance of Hawthorn winning, while the line market implies a 17.6-point margin in favour of Hawthorn. The Squiggle model prediction is not available for this match. Given the lack of model data, the market and form data are weighted more heavily, with the market's implied probability adjusted downward due to the Giants' strong scoring average.

FATIGUE & TRAVEL IMPACT:

Hawthorn has 7 days rest, while GWS Giants have 6 days rest, which may lead to fatigue for the Giants. The travel impact is minimal, with a short 1h25m flight from Sydney to Melbourne. Fatigue is a potential factor for this match, especially for GWS Giants.

WEATHER IMPACT:

The forecast is for fine conditions, with a maximum temperature of 12°C, 0.0mm of rain, and 9 km/h wind. The weather is unlikely to significantly affect the result, with no clear advantage for either team.

TEAM NEWS IMPACT:

There is limited team news available, with some doubt about Will Day's game time for Hawthorn due to his shoulder injury. No other significant ins or outs are reported.

CONFIDENCE: Medium

The data sources generally agree on Hawthorn's advantage, but the probability is adjusted downward due to the Giants' strong scoring

average and the Hawks' inconsistent recent form.

UPSET RISK: Medium

Specific data points that support an upset include GWS Giants' strong scoring average (101.8 points over the last 5 games), their recent win over Melbourne by 49 points, and Hawthorn's inconsistent recent form (3/5 wins).

DATA CONFLICTS: None identified.

Round 16 | Docklands | 2026-06-27

Carlton vs West Coast

MEDIUM CONFIDENCE

TIP: Carlton

73% win probability approx. 24pt margin

Carlton \$1.16 (86.1% implied) | West Coast \$5.27 (19.0% implied) | Line: Carlton Blues giving 33.8 pts

PREDICTED WINNER: Carlton

WIN PROBABILITY: Carlton: 73% | West Coast: 27%

The win probability is driven by a weighted blend of the betting market (60% weight), Squiggle model (20% weight), and form data (20% weight), with the market's implied probability of 86.1% for Carlton being adjusted downward to account for the bookmaker's overround and the potential for West Coast to be more competitive than their recent form suggests.

PREDICTED MARGIN: ~24 points

The predicted margin is anchored to the line market of 33.8 points and adjusted downward based on West Coast's relatively stable scoring trends and Carlton's average margin of +15.6 points over their last 5 games.

KEY FACTORS:

- Carlton's recent form, with 5 consecutive wins and an average margin of +15.6 points, suggests they are a strong team at the moment.
- West Coast's away record this season is poor, with only 1 win from 7 games, which could be a significant disadvantage in this match.
- The head-to-head record between the two teams is heavily in Carlton's favor, with 6 consecutive wins and an average score of 119.0 vs 50.3.
- The venue record at Docklands also favors Carlton, with a 38% win rate compared to West Coast's 37% win rate, although the sample size is larger for Carlton.

SCORING TRENDS ANALYSIS:

Carlton's last-5 average is 82.8 points for and 67.2 points against, while their last-3 average is 82.7 points for and 72.0 points against. Their attack and defense are both trending stable. West Coast's last-5 average is 79.8 points for and 73.8 points against, while their last-3 average is 76.3 points for and 68.7 points against. Their attack and defense are also both trending stable. Carlton's scoring profile gives them an advantage due to their higher average score and more consistent defense.

HOME GROUND ADVANTAGE:

Carlton has a 50% win rate at home this season, while West Coast has a 43% win rate at home. At Docklands, Carlton has a 38% win rate, while West Coast has a 37% win rate. The point value of home advantage for this match is estimated to be around 8-10 points, based on the general AFL home ground advantage and the specific venue records.

MARKET & MODEL ANALYSIS:

The head-to-head market implies a 86.1% chance of Carlton winning, while the line market implies a 33.8-point margin in favor of Carlton. The Squiggle model predicts a 31.5-point margin in favor of Carlton. The market and model are generally in agreement, with the model predicting a slightly lower margin than the market. The model is weighted more heavily due to its objective analysis of team performance.

FATIGUE & TRAVEL IMPACT:

Carlton has 7 days of rest, while West Coast has 14 days of rest after a bye week. West Coast also has to travel from Perth to Melbourne, which could be a factor. However, given the extended rest period, fatigue is unlikely to be a significant factor for West Coast.

WEATHER IMPACT:

The weather forecast is neutral, as the match is being played at Marvel Stadium, which has a roof. Therefore, the weather conditions will not affect the match.

TEAM NEWS IMPACT:

There is no relevant team news available for either team, so no impact is expected.

CONFIDENCE: Medium

The data sources generally agree on Carlton being the favorite, but the margin of victory is less certain, leading to a medium confidence level.

UPSET RISK: Low

The upset risk is low due to Carlton's strong recent form, the head-to-head record, and the venue advantage. However, West Coast's stable scoring trends and the potential for them to be more competitive than their recent form suggests are factors that could contribute to an upset.

DATA CONFLICTS: None identified

There are no significant conflicts between the data sources, with the market, model, and form data all suggesting Carlton as the likely winner.

Round 16 | MCG | 2026-06-27

Collingwood vs Richmond

MEDIUM CONFIDENCE

TIP: Collingwood

73% win probability approx. 25pt margin

Collingwood \$1.11 (89.9% implied) | Richmond \$6.61 (15.1% implied) | Line: Collingwood Magpies giving 37.5 pts

PREDICTED WINNER: Collingwood

WIN PROBABILITY: Collingwood: 73% | Richmond: 27%

The win probability is driven by a weighted blend of the betting market (40% weight), Squiggle model (30% weight), and form data (30% weight), with the market's implied probability of 89.9% for Collingwood being adjusted downward to account for the overround and the team's recent form.

PREDICTED MARGIN: ~25 points

The predicted margin is anchored to the line market of 37.5 points and adjusted downward based on Collingwood's average margin of +3.8 points over the last 5 games and Richmond's average margin of -38.4 points over the last 5 games.

KEY FACTORS:

- Collingwood's recent form, with an average score of 82.6 points for and 78.8 points against over the last 5 games, suggests they have a stable attack and defence.
- Richmond's defence trend is "leaking more", with an average of 104.6 points against over the last 5 games, which could be exploited by Collingwood's attack.
- The head-to-head record between the two teams shows Collingwood with a 75% win rate over the last 4 meetings, with an average score of 83.8 vs 71.5.
- Collingwood's home ground advantage, with a 43% win rate at home this season and a historical win rate of 54% at the MCG, could provide a significant boost.

SCORING TRENDS ANALYSIS:

Collingwood's last-5 average is 82.6 points for and 78.8 points against, while their last-3 average is 82.0 points for and 77.0 points against. Their attack and defence are trending stable. Richmond's last-5 average is 66.2 points for and 104.6 points against, while their last-3 average is 61.3 points for and 119.3 points against. Their attack is stable, but their defence is trending downward. Collingwood's scoring profile gives them an advantage due to their stable attack and defence.

HOME GROUND ADVANTAGE:

Collingwood has a 43% win rate at home this season, while Richmond has a 14% win rate away from home. At the MCG, Collingwood has a historical win rate of 54% and an average margin of +4.4 points, while Richmond has a historical win rate of 54% and an average margin of +1.7 points. The estimated point value of home advantage for this match is around 8-10 points.

MARKET & MODEL ANALYSIS:

The head-to-head market implies a Collingwood win, with an implied probability of 89.9%. The line market implies a Collingwood win by 37.5 points. The Squiggle model predicts a Collingwood win by 32.0 points. The market and model agree on a Collingwood win, but the model predicts a slightly lower margin.

FATIGUE & TRAVEL IMPACT:

Collingwood has 7 days of rest, while Richmond has 6 days of rest, which could lead to some fatigue. However, since both teams are playing at home in Melbourne, travel is not a factor. Fatigue is not a significant factor for this match.

WEATHER IMPACT:

The forecast is for a max of 10°C, with no rain and minimal wind. The conditions are neutral and do not favour one team over the other.

TEAM NEWS IMPACT:

There is limited team news available, with only two articles mentioning Collingwood's defender Billy Frampton facing the AFL Tribunal. The impact of this news is unclear, and there is no confirmed team news for either side.

CONFIDENCE: Medium

The data sources generally agree on a Collingwood win, but the margin of victory is less certain, leading to a medium confidence level.

UPSET RISK: Low

The data points that support a low upset risk include Collingwood's recent form, their head-to-head record against Richmond, and their home ground advantage. Richmond's poor recent form and defensive trends also suggest a low upset risk.

DATA CONFLICTS: None identified

There are no significant conflicts between the data sources, with the market, model, and form data all suggesting a Collingwood win.

Round 16 | Adelaide Oval | 2026-06-27

Port Adelaide vs Adelaide

MEDIUM CONFIDENCE

TIP: Adelaide

58% win probability approx. 10pt margin

Port Adelaide \$3.83 (26.1% implied) | Adelaide \$1.27 (78.7% implied) | Line: Adelaide Crows giving 22.5 pts

PREDICTED WINNER: Adelaide

WIN PROBABILITY: Port Adelaide: 42% | Adelaide: 58%

The win probability is derived from a weighted blend of the betting market (40% weight), Squiggle model (30% weight), and form data (30% weight), with the market's implied probabilities adjusted to remove the bookmaker's overround. The betting market and Squiggle model both favour Adelaide, while the form data suggests a closer contest.

PREDICTED MARGIN: ~10 points

The predicted margin is anchored to the line market, which gives Adelaide a 22.5-point advantage, and the scoring margin averages, with Adelaide's average margin over the last 5 games being +26.8 points and Port Adelaide's being -16.6 points. However, considering the home ground advantage and the teams' recent form, a margin of ~10 points is more likely.

KEY FACTORS:

- Adelaide's strong recent form, with 4 wins in their last 5 games, and an average score of 94.8 points for and 68.0 points against over the same period.
- Port Adelaide's poor recent form, with only 1 win in their last 5 games, and an average score of 69.8 points for and 86.4 points against over the same period.
- The significant home ground advantage at Adelaide Oval, where Adelaide has a 5-0 record in their last 5 games, with an average margin of +17.6 points.
- The head-to-head record between the two teams, with Adelaide winning 7 of their last 9 meetings, including the last meeting at Adelaide Oval.

SCORING TRENDS ANALYSIS:

Port Adelaide's last-5 average is 69.8 points for and 86.4 points against, while their last-3 average is 72.7 points for and 80.7 points against. Their attack and defence are both trending stable. Adelaide's last-5 average is 94.8 points for and 68.0 points against, while their last-3 average is 91.7 points for and 66.7 points against. Their attack and defence are both trending stable. Adelaide's scoring profile gives them an advantage due to their higher average score and stronger defence.

HOME GROUND ADVANTAGE:

Port Adelaide has a 2-7 home record this season, while Adelaide has a 6-8 home record. At Adelaide Oval, Port Adelaide has a 1-4 record in their last 5 games, while Adelaide has a 5-0 record in their last 5 games. The estimated point value of home advantage for this match is around 10-12 points, considering the significant difference in the teams' home records and the venue history.

MARKET & MODEL ANALYSIS:

The head-to-head market implies a 78.7% chance of Adelaide winning, while the line market gives Adelaide a 22.5-point advantage. The Squiggle model predicts a 6.7-point win for Adelaide. The market and model agree on an Adelaide win, but the margin differs. The market's implied margin is higher than the Squiggle model's prediction, and the form data suggests a closer contest.

FATIGUE & TRAVEL IMPACT:

Both teams have 7 days of rest, and neither team has to travel. Fatigue is not a significant factor for this match.

WEATHER IMPACT:

The forecast is for a fine day with no rain and moderate wind. The conditions are neutral and do not favour one team over the other.

TEAM NEWS IMPACT:

There is no significant team news available for this match, with no confirmed ins or outs that would impact the teams' chances.

CONFIDENCE: Medium

The data sources generally agree on an Adelaide win, but the margin and win probability differ. The form data and head-to-head record suggest a closer contest than the market and Squiggle model predict.

UPSET RISK: Medium

The upset risk is supported by Port Adelaide's ability to score points, with an average of 72.7 points for in their last 3 games, and their historical record at Adelaide Oval, where they have a 60% win rate. Additionally, the market's implied margin is higher than the Squiggle model's prediction, which could indicate an overestimation of Adelaide's chances.

DATA CONFLICTS: None identified

There are no significant conflicts between the data sources, with the market, model, and form data all suggesting an Adelaide win, although with differing margins and win probabilities.

Round 16 | Docklands | 2026-06-28

North Melbourne vs Essendon

MEDIUM CONFIDENCE

TIP: North Melbourne

62% win probability approx. 10pt margin

North Melbourne \$1.44 (69.3% implied) | Essendon \$2.8 (35.7% implied) | Line: North Melbourne Kangaroos giving 15.4 pts

PREDICTED WINNER: North Melbourne

WIN PROBABILITY: North Melbourne: 62% | Essendon: 38%

The probability is driven by a weighted blend of the betting market (40% weight), Squiggle model (30% weight), and form data (30% weight), with the market's implied probability of 69.3% for North Melbourne being adjusted downward due to the team's inconsistent recent form.

PREDICTED MARGIN: ~10 points

The predicted margin is anchored to the line market of 15.4 points and adjusted downward based on North Melbourne's average margin of -32.0 points over the last 5 games, suggesting that the market's expected margin may be too high.

KEY FACTORS:

- North Melbourne's significant home ground advantage, with a 29pp higher win rate at home (62% vs 33% away).
- Essendon's poor away record, with 0 wins from 7 games, and an average margin of -41.0 points at Docklands over the last 5 games.
- North Melbourne's recent form, with 3 wins from 5 games, including a 25-point win over Richmond, suggests that they have the potential to perform well against weaker opponents.
- Essendon's stable attack and defence trends, but with an average score of 57.8 points for and 86.0 points against over the last 5 games, indicating a potential weakness in their scoring profile.

SCORING TRENDS ANALYSIS:

North Melbourne's last-5 average is 70.8 points for and 102.8 points against, with a declining attack trend and a tightening defence trend. Their last-3 average is 59.3 points for and 92.0 points against. Essendon's last-5 average is 57.8 points for and 86.0 points against, with a stable attack trend and a stable defence trend. Their last-3 average is 57.3 points for and 84.0 points against. North Melbourne's scoring profile gives them an advantage due to their higher average score for over the last 5 games.

HOME GROUND ADVANTAGE:

North Melbourne has a home win rate of 62% (5/8) and an away win rate of 33% (2/6) this season. Essendon has a home win rate of 14% (1/7) and an away win rate of 0% (0/7) this season. At Docklands, North Melbourne has a record of 4W-1L over the last 5 games, with an average margin of +19.0 points. Essendon has a record of 0W-5L over the last 5 games, with an average margin of -41.0 points. The estimated point value of home advantage for this match is around 10-15 points.

MARKET & MODEL ANALYSIS:

The h2h market implies a 69.3% chance of North Melbourne winning, while the line market implies a 15.4-point margin in favor of North Melbourne. The Squiggle model predicts a 15.1-point margin in favor of North Melbourne, with a win probability of 59.8% for North Melbourne. The market and model generally agree, but the model's predicted margin is slightly lower than the market's.

FATIGUE & TRAVEL IMPACT:

North Melbourne has 7 days of rest, while Essendon has 15 days of rest due to a bye week. Neither team has significant travel, as both are based in Melbourne. Fatigue is not a significant factor for this match.

WEATHER IMPACT:

The weather forecast is neutral, as the game is being played at Docklands, which has a roof. The conditions will not favor one team over the other based on their scoring style.

TEAM NEWS IMPACT:

Paul Curtis, a North Melbourne forward, is suspended for 3 matches. Archie Roberts, an Essendon defender, is expected to return in a few weeks after dislocating his shoulder. The team news has a limited impact on this match, but Curtis's suspension may affect North Melbourne's scoring potential.

CONFIDENCE: Medium

The data sources generally agree, but there is some uncertainty due to North Melbourne's inconsistent recent form and Essendon's stable trends.

UPSET RISK: Medium

The upset risk is supported by Essendon's stable trends and North Melbourne's declining attack trend, as well as the fact that Essendon has had 15 days of rest and may be more refreshed than North Melbourne.

DATA CONFLICTS: None identified.

Round 16 | Perth Stadium | 2026-06-28

Fremantle vs Gold Coast

MEDIUM CONFIDENCE

TIP: Fremantle

75% win probability approx. 30pt margin

Fremantle \$1.2 (83.4% implied) | Gold Coast \$4.57 (21.9% implied) | Line: Fremantle Dockers giving 28.4 pts

PREDICTED WINNER: Fremantle

WIN PROBABILITY: Fremantle: 75% | Gold Coast: 25%

The probability is driven by a weighted blend of the betting market (60% weight), Squiggle model (20% weight), and form data (20% weight), with the market's implied probability of 83.4% for Fremantle adjusted downward to account for the bookmaker's overround and the potential for Gold Coast to cause an upset.

PREDICTED MARGIN: ~30 points

The predicted margin is anchored to the line market, which gives Fremantle a 28.4-point advantage, and the scoring margin averages, with Fremantle's average margin over the last 5 games being +46.2 points and Gold Coast's average margin being -14.6 points.

KEY FACTORS:

1. Fremantle's strong recent form, with 5 consecutive wins and an average score of 113.0 points for and 66.8 points against over the last 5 games.
2. Gold Coast's declining attack trend, with their average score over the last 3 games being 77.3 points, which is 9.7 points lower than their average score over the last 5 games.
3. Fremantle's strong home ground advantage, with a 100% win rate at Perth Stadium this season and an average margin of +24.8 points over the last 5 games at the venue.
4. Gold Coast's poor away record, with a 1-6 win-loss record and an average margin of -21.5 points over the last 5 away games.

SCORING TRENDS ANALYSIS:

Fremantle's last-5 average is 113.0 points for and 66.8 points against, while their last-3 average is 119.0 points for and 66.3 points against. Their attack is trending stable, while their defence is also trending stable. Gold Coast's last-5 average is 87.0 points for and 101.6 points against, while their last-3 average is 77.3 points for and 108.0 points against. Their attack is trending down, while their defence is trending stable. Fremantle's scoring profile gives them an advantage due to their high-scoring attack and strong defence.

HOME GROUND ADVANTAGE:

Fremantle has a 100% win rate at home this season, while Gold Coast has a 17% win rate away from home. At Perth Stadium, Fremantle has a 61% win rate and an average margin of +6.4 points, while Gold Coast has a 36% win rate and an average margin of -2.5 points. The estimated point value of home advantage for this match is around 10-15 points, based on the historical data and the teams' current form.

MARKET & MODEL ANALYSIS:

The head-to-head market implies a 83.4% chance of Fremantle winning, while the line market implies a 28.4-point advantage for Fremantle. The Squiggle model predicts a 29.2-point win for Fremantle, which is in line with the market's expectations. The data sources agree on Fremantle being the likely winner, but the probability and margin may be adjusted based on the teams' form and other factors.

FATIGUE & TRAVEL IMPACT:

Fremantle has had 10 days of rest, while Gold Coast has had 9 days of rest. Gold Coast has to travel to Perth, which may cause some fatigue. However, the travel impact is likely to be minimal, given the relatively short travel time and the teams' similar rest periods.

WEATHER IMPACT:

The weather forecast is unavailable, so it is unclear whether the conditions will favour one team over the other. However, based on the teams' scoring styles, Fremantle's high-scoring attack may be less affected by adverse weather conditions than Gold Coast's struggling attack.

TEAM NEWS IMPACT:

There is no relevant team news available for either team, so the impact is unknown. However, the lack of team news suggests that both teams will likely field their strongest lineups, which may favour Fremantle given their stronger form and home ground advantage.

CONFIDENCE: Medium

The data sources agree on Fremantle being the likely winner, but the probability and margin may be adjusted based on the teams' form and other factors, which introduces some uncertainty into the prediction.

UPSET RISK: Low

The specific data points that support a low upset risk include Fremantle's strong recent form, Gold Coast's declining attack trend, and Fremantle's strong home ground advantage. While Gold Coast has a chance to cause an upset, the data suggests that Fremantle is the more likely winner.

DATA CONFLICTS: None identified

There are no obvious conflicts between the data sources, with the market, model, and form data all suggesting that Fremantle is the likely winner. However, the lack of team news and weather forecast may introduce some uncertainty into the prediction.
