DETAILED MATCH ANALYSIS

Round 18 | Perth Stadium | 2026-07-09

Fremantle vs Sydney

MEDIUM CONFIDENCE

TIP: Fremantle 60% win probability approx. 10pt margin
Fremantle \$1.46 (68.7% implied) | Sydney \$2.76 (36.2% implied) | Line: Fremantle Dockers giving 13.2 pts

PREDICTED WINNER: Fremantle

WIN PROBABILITY: Fremantle: 60% | Sydney: 40%

The probability is derived from a weighted blend of the betting market (30%), Squiggle model (25%), and form data (45%), with a focus on Fremantle's significant home ground advantage and recent scoring trends.

PREDICTED MARGIN: ~10 points

The predicted margin is anchored to the line market (13.2 points) and adjusted based on the teams' average margins over the last 5 games (Fremantle: +37.6 points, Sydney: +22.2 points), with a slight reduction to account for Sydney's stable defence trend.

KEY FACTORS:

- Fremantle's significant home ground advantage, with a 22pp higher win rate at home (100% this season) and a +6.9 average margin at Perth Stadium.
- Sydney's declining attack trend, with an average score of 88.7 points over the last 3 games, which may struggle against Fremantle's defence.
- Fremantle's average margin over the last 5 games (+37.6 points), which suggests they have a strong overall performance.
- The head-to-head record between the two teams, with Fremantle having a 29% win rate over the last 7 meetings, but with a more

recent win in 2024.

SCORING TRENDS ANALYSIS:

Fremantle's last-5 average is 105.0 points for and 67.4 points against, while their last-3 average is 89.0 points for and 76.0 points against. Their attack is trending down, and their defence is leaking more. Sydney's last-5 average is 108.0 points for and 85.8 points against, while their last-3 average is 88.7 points for and 90.3 points against. Their attack is also trending down, but their defence is stable. Fremantle's scoring profile gives them an advantage due to their significant home ground advantage and higher average margin.

HOME GROUND ADVANTAGE:

Fremantle has a 100% win rate at home this season, while Sydney has a 57% win rate away from home. At Perth Stadium, Fremantle has a 62% win rate, while Sydney has a 75% win rate. The estimated point value of home advantage for this match is around 8-10 points, based on the significant difference in win rates.

MARKET & MODEL ANALYSIS:

The head-to-head market implies a 68.7% chance of Fremantle winning, while the line market implies a 13.2-point margin. The Squiggle model predicts an 11.2-point margin in favour of Fremantle. The market and model generally agree, with a slight variation in the predicted margin.

FATIGUE & TRAVEL IMPACT:

Fremantle has 5 days of rest, while Sydney has 6 days of rest. Both teams have a short turnaround, but Sydney has a slightly longer rest period. Travel may be a factor for Sydney, but the impact is likely minimal.

WEATHER IMPACT:

The weather forecast is unavailable, so it is unclear whether the conditions will favour one team over the other.

TEAM NEWS IMPACT:

Hayden Young is in doubt for Fremantle due to a groin injury, but the impact is uncertain. There is no other significant team news available.

CONFIDENCE: Medium

The data sources generally agree, but there is some uncertainty due to the short turnaround and travel for both teams.

UPSET RISK: Medium

Specific data points that support an upset include Sydney's stable defence trend and their recent win over Western Bulldogs. Additionally, Fremantle's declining attack trend and leaking defence may provide opportunities for Sydney to capitalize.

DATA CONFLICTS: None identified.

Round 18 | Docklands | 2026-07-10

Collingwood vs North Melbourne

MEDIUM CONFIDENCE

TIP: Collingwood

58% win probability approx. 10pt margin

Collingwood \$1.38 (72.6% implied) | North Melbourne \$3.09 (32.4% implied) | Line: Collingwood Magpies giving 17.5 pts

PREDICTED WINNER: Collingwood

WIN PROBABILITY: Collingwood: 58% | North Melbourne: 42%

The win probability is derived from a weighted blend of the betting market (40%), Squiggle model (30%), and form data (30%), with the market's implied probabilities adjusted to remove the bookmaker's overround. The betting market and Squiggle model both favour Collingwood, while the form data suggests a closer contest.

PREDICTED MARGIN: ~10 points

The predicted margin is anchored to the line market of 17.5 points and adjusted based on the average scoring margins of both teams, with Collingwood's average margin of +11.0 points over the last 5 games and North Melbourne's average margin of -21.0 points over the last 5 games.

KEY FACTORS:

- Collingwood's recent form, with 3 wins in their last 5 games, including a 34-point win over Richmond, suggests they have a strong attacking unit.
- North Melbourne's defence has been tightening, with an average of 62.0 points conceded over their last 3 games, which may limit Collingwood's scoring opportunities.
- Collingwood's historical record at Docklands, with a 58% win rate and an average margin of +9.7 points, suggests they have a significant home ground advantage.
- The betting market implies a Collingwood win, with a 72.6% implied probability, which is supported by the Squiggle model's predicted margin of 5.9 points.

SCORING TRENDS ANALYSIS:

Collingwood's last-5 average is 91.2 points for and 80.2 points against, with their last-3 average being 96.0 points for and 73.7 points against. Their attack is stable, while their defence is also stable. North Melbourne's last-5 average is 61.8 points for and 82.8 points against, with their last-3 average being 68.0 points for and 62.0 points against. Their attack is stable, while their defence is tightening. Collingwood's scoring profile gives them an advantage due to their higher average scoring and stable attack.

HOME GROUND ADVANTAGE:

Collingwood has a 50% win rate at home and a 50% win rate away this season. At Docklands, they have a 58% historical win rate and an average margin of +9.7 points. North Melbourne has a 67% win rate at home and a 29% win rate away this season. At Docklands, they have a 48% historical win rate and an average margin of -0.6 points. The estimated point value of home advantage for this match is around 8-10 points, based on Collingwood's historical record at the venue.

MARKET & MODEL ANALYSIS:

The head-to-head market implies a Collingwood win, with a 72.6% implied probability. The line market implies a Collingwood win by 17.5 points. The Squiggle model predicts a Collingwood win by 5.9 points. The market and model agree on a Collingwood win, but the line market implies a larger margin than the Squiggle model.

FATIGUE & TRAVEL IMPACT:

Collingwood has 6 days of rest, while North Melbourne has 5 days of rest. Neither team has significant travel, as both are based in Melbourne. Fatigue is not a significant factor for this match, given the short rest periods for both teams.

WEATHER IMPACT:

The weather forecast is neutral, as the match is played at Marvel Stadium, which has a roof. The weather conditions will not favour one team over the other.

TEAM NEWS IMPACT:

There is limited team news available, with North Melbourne's George Wardlaw suffering a suspected hamstring injury and Paul Curtis serving a three-match ban. The impact of these injuries and suspensions on the team's performance is uncertain.

CONFIDENCE: Medium

The data sources generally agree on a Collingwood win, but the predicted margin and win probability are influenced by the conflicting signals from the line market and Squiggle model.

UPSET RISK: Medium

The upset risk is supported by North Melbourne's recent form, with 3 wins in their last 5 games, and their ability to tighten their defence, which may limit Collingwood's scoring opportunities.

DATA CONFLICTS:

None identified, although the line market and Squiggle model provide slightly different predictions for the margin of the game.

Round 18 | Docklands | 2026-07-11

St Kilda vs Port Adelaide

MEDIUM CONFIDENCE

TIP: St Kilda

58% win probability approx. 4pt margin

St Kilda \$1.57 (63.8% implied) | Port Adelaide \$2.43 (41.1% implied) | Line: St Kilda Saints giving 9.8 pts

PREDICTED WINNER: St Kilda

WIN PROBABILITY: St Kilda: 58% | Port Adelaide: 42%

The probability is driven by a weighted blend of the betting market (40% weight), Squiggle model (30% weight), and form data (30% weight), with the market's implied probability of 63.8% for St Kilda being adjusted downward due to the relatively even recent form of the two teams.

PREDICTED MARGIN: ~4 points

The predicted margin is anchored to the line market of 9.8 points, but adjusted downward due to St Kilda's average margin of -0.2 points over the last 5 games and Port Adelaide's average margin of +4.6 points over the same period.

KEY FACTORS:

- St Kilda's home ground advantage, with a 55% win rate at Docklands historical and an average margin of +5.0 points, compared to Port Adelaide's 46% win rate and average margin of -6.9 points at the same venue.
- Port Adelaide's stable attack and defence trends, with an average score of 77.6 points for and 73.0 points against over the last 5 games.
- St Kilda's tightening defence trend, with an average score of 73.7 points against over the last 3 games, compared to 88.8 points against over the last 5 games.
- The head-to-head record between the two teams, with St Kilda winning 2 of the last 6 meetings, but Port Adelaide winning 4 of the last 6 meetings.

SCORING TRENDS ANALYSIS:

St Kilda's last-5 average is 88.6 points for and 88.8 points against, while their last-3 average is 91.3 points for and 73.7 points against. Their attack is stable, while their defence is trending downward. Port Adelaide's last-5 average is 77.6 points for and 73.0 points against, while their last-3 average is 73.7 points for and 67.0 points against. Their attack and defence are both stable. St Kilda's scoring profile gives them an advantage due to their higher average score over the last 5 games.

HOME GROUND ADVANTAGE:

St Kilda has a home win rate of 43% and an away win rate of 44% this season, while Port Adelaide has a home win rate of 44% and an

away win rate of 29% this season. At Docklands, St Kilda has a 55% win rate and an average margin of +5.0 points, while Port Adelaide has a 46% win rate and an average margin of -6.9 points. The estimated point value of home advantage for this match is around 8-10 points.

MARKET & MODEL ANALYSIS:

The head-to-head market implies a 63.8% chance of St Kilda winning, while the line market implies a 9.8-point margin in favour of St Kilda. The Squiggle model predicts a 10.1-point margin in favour of St Kilda, with a 56.6% chance of St Kilda winning. The market and model agree on St Kilda as the likely winner, but the model predicts a slightly higher margin.

FATIGUE & TRAVEL IMPACT:

Both teams have 6 days of rest, with Port Adelaide travelling from Adelaide to Melbourne, a short 1 hour and 15 minute flight. Fatigue is not a significant factor for this match.

WEATHER IMPACT:

The weather forecast is neutral, with the game being played at Marvel Stadium, which has a roof. The weather conditions will not affect the game.

TEAM NEWS IMPACT:

St Kilda's Max King is recovering from injury, but his status is unclear. St Kilda's Jack Sinclair is out for the season with a calf injury. Port Adelaide has no significant team news.

CONFIDENCE: Medium

The data sources generally agree on St Kilda as the likely winner, but the margin of victory is uncertain due to the relatively even recent form of the two teams.

UPSET RISK: Medium

The upset risk is supported by Port Adelaide's stable attack and defence trends, as well as their recent win over North Melbourne. Additionally, St Kilda's defence trend is tightening, which could lead to a closer game than expected.

DATA CONFLICTS: None identified.

Round 18 | Sydney Showground | 2026-07-11

GWS Giants vs Geelong

MEDIUM CONFIDENCE

TIP: GWS Giants

55% win probability approx. 4pt margin

GWS Giants \$2.34 (42.7% implied) | Geelong \$1.61 (62.0% implied) | Line: Geelong Cats giving 9.4 pts

PREDICTED WINNER: GWS Giants

WIN PROBABILITY: GWS Giants: 55% | Geelong: 45%

The betting market implied probabilities were used as a starting point, but adjusted based on the teams' recent form and home ground advantage, with a weight of 40% on the market, 30% on form data, and 30% on venue history.

PREDICTED MARGIN: ~4 points

This prediction is anchored to the line market, which gives Geelong a 9.4-point advantage, but adjusted based on GWS Giants' strong

home record and Geelong's relatively poor away record, with GWS Giants averaging a +7.3-point margin at Sydney Showground.

KEY FACTORS:

1. GWS Giants have a significant home ground advantage, with a 75% win rate at home this season and a +16pp higher win rate at home over the multi-year pattern.
2. Geelong have a poor away record, with only a 14% win rate away from home this season, which could be a significant factor in this match.
3. GWS Giants have a strong recent record against Geelong, with a 4-1 win-loss record in their last 5 meetings, including a 111-85 win at Sydney Showground in 2025.
4. Geelong's attack and defence are both trending stable, but GWS Giants' defence has been stable while their attack has shown some inconsistency, which could be a factor in this match.

SCORING TRENDS ANALYSIS:

GWS Giants: last-5 average 92.6 points for, 87.6 points against; last-3 average 85.3 points for, 90.7 points against. Attack trend: stable; Defence trend: stable.

Geelong: last-5 average 90.8 points for, 89.0 points against; last-3 average 98.7 points for, 94.0 points against. Attack trend: stable; Defence trend: stable.

GWS Giants' scoring profile gives them an advantage due to their strong home record and ability to restrict opponents' scoring.

HOME GROUND ADVANTAGE:

GWS Giants: 75% win rate at home, 12% win rate away; Geelong: 89% win rate at home, 14% win rate away.

GWS Giants have a strong record at Sydney Showground, with a 60% win rate over 111 games, while Geelong have a poor record at the venue, with a 40% win rate over 5 games.

The estimated point value of home advantage for this match is around 10-12 points.

MARKET & MODEL ANALYSIS:

The head-to-head market implies a 62% chance of Geelong winning, while the line market gives Geelong a 9.4-point advantage.

There is no Squiggle model prediction available for this match.

The market and form data disagree, with the market favouring Geelong and the form data favouring GWS Giants. The form data was weighted more heavily due to the significant home ground advantage and recent head-to-head record.

FATIGUE & TRAVEL IMPACT:

GWS Giants have 7 days rest, while Geelong have 9 days rest. Geelong have a short travel to Sydney, which is unlikely to have a significant impact.

Fatigue is not a significant factor for this match, with both teams having sufficient rest.

WEATHER IMPACT:

The forecast is for fine conditions, with a maximum temperature of 16°C and no rain.

The weather conditions are neutral and unlikely to favour one team over the other.

TEAM NEWS IMPACT:

There is no significant team news available for either team, with no confirmed ins or outs.

The lack of team news means that the prediction is based solely on the available form and statistical data.

CONFIDENCE: Medium

The data sources agree on the significance of home ground advantage, but disagree on the relative strengths of the teams, with the market favouring Geelong and the form data favouring GWS Giants.

UPSET RISK: Medium

Specific data points that support an upset include GWS Giants' strong home record, their recent head-to-head record against Geelong, and Geelong's poor away record.

DATA CONFLICTS: None identified.

Round 18 | MCG | 2026-07-11

Carlton vs Hawthorn

MEDIUM CONFIDENCE

TIP: Hawthorn

55% win probability approx. 5pt margin

Carlton \$2.53 (39.5% implied) | Hawthorn \$1.53 (65.4% implied) | Line: Hawthorn Hawks giving 11.1 pts

PREDICTED WINNER: Hawthorn

WIN PROBABILITY: Carlton: 45% | Hawthorn: 55%

The probability is driven by a weighted blend of the betting market (40% weight), Squiggle model (30% weight), and form data (30% weight), with the market's implied probabilities and the Squiggle model's prediction both slightly favouring Hawthorn, while the form data suggests a closer contest.

PREDICTED MARGIN: ~5 points

The predicted margin is anchored to the line market, which implies a margin of 11.1 points, but is adjusted downwards based on the average margin of the two teams in their last 5 games (Carlton's +17.4 points and Hawthorn's +8.2 points), as well as the expected impact of the heavy rain on the game.

KEY FACTORS:

- Hawthorn's higher scoring average in their last 5 games (97.8 points) compared to Carlton (87.8 points) suggests they have a more potent attack.
- Carlton's stable defence trend and Hawthorn's leaking defence trend (^) may lead to a higher-scoring game, but the rain is likely to reduce the effectiveness of both teams' attacks.
- The head-to-head record between the two teams shows that Hawthorn has won 3 of the last 5 meetings, with an average margin of 11.4 points.
- The home ground advantage at the MCG, where Carlton has a 47% win rate and Hawthorn has a 56% win rate, may give Hawthorn a slight edge.

SCORING TRENDS ANALYSIS:

Carlton's last-5 average is 87.8 points, and their last-3 average is 93.0 points, with a stable attack and defence trend. Hawthorn's last-5 average is 97.8 points, and their last-3 average is 99.7 points, with a stable attack trend but a defence trend that is leaking more. Hawthorn's scoring profile gives them an advantage due to their higher scoring average, but the rain may reduce the effectiveness of their attack.

HOME GROUND ADVANTAGE:

Carlton has a 57% home win rate and a 44% away win rate this season, while Hawthorn has a 78% home win rate and a 57% away win rate. At the MCG, Carlton has a 47% win rate and Hawthorn has a 56% win rate. The estimated point value of home advantage for this match is around 2-3 points, but this is reduced due to the fact that both teams are playing at a neutral venue.

MARKET & MODEL ANALYSIS:

The head-to-head market implies a 65.4% chance of Hawthorn winning, while the line market implies a margin of 11.1 points. The Squiggle model predicts a Hawthorn win with a margin of 3.5 points. The market and model agree on a Hawthorn win, but the model predicts a closer game.

FATIGUE & TRAVEL IMPACT:

Both teams have had 7 days of rest, and neither team has had to travel. Fatigue is not a significant factor for this match.

WEATHER IMPACT:

The forecast is for heavy rain, which is likely to reduce the effectiveness of both teams' attacks and lead to a more contested game. This may favour Carlton, who have a more stable defence trend.

TEAM NEWS IMPACT:

Hawthorn's Nick Watson will miss the game with a hamstring injury, and Conor Nash may also miss the remainder of the season with a neck injury. This may reduce Hawthorn's attacking potency.

CONFIDENCE: Medium

The data sources generally agree on a Hawthorn win, but the form data and the Squiggle model suggest a closer game, which reduces the confidence in the prediction.

UPSET RISK: Medium

The upset risk is supported by Carlton's stable defence trend, their recent form, and the potential impact of the heavy rain on the game. Additionally, the Squiggle model's prediction of a close game and the fact that the line market implies a margin of 11.1 points, which may be too high, also suggest that an upset is possible.

DATA CONFLICTS: None identified.

Round 18 | Adelaide Oval | 2026-07-11

Adelaide vs Gold Coast

MEDIUM CONFIDENCE

TIP: Adelaide

62% win probability approx. 15pt margin

Adelaide \$1.36 (73.5% implied) | Gold Coast \$3.18 (31.4% implied) | Line: Adelaide Crows giving 16.9 pts

PREDICTED WINNER: Adelaide

WIN PROBABILITY: Adelaide: 62% | Gold Coast: 38%

The probability is driven by a weighted blend of the betting market (implied probabilities: 73.5% for Adelaide, 31.4% for Gold Coast), the Squiggle model (58.8% for Adelaide, 41.2% for Gold Coast), and form data (Adelaide's recent form and home ground advantage), with the betting market and Squiggle model given more weight due to their consistency.

PREDICTED MARGIN: ~15 points

The predicted margin is anchored to the line market (Adelaide giving 16.9 points) and scoring margin averages (Adelaide's average margin of +14.8 points in the last 5 games), with an adjustment for the heavy rain forecast, which tends to reduce margins.

KEY FACTORS:

1. Adelaide's recent form: They have won 4 of their last 5 games, with an average margin of +14.8 points.

- 2. Gold Coast's recent form: They have lost their last 5 games, with an average margin of -29.8 points.
- 3. Home ground advantage: Adelaide has a significant home ground advantage, with a 75% win rate at home this season, compared to Gold Coast's 14% away win rate.
- 4. Scoring trends: Adelaide's attack and defence are stable, while Gold Coast's attack and defence are also stable, but with lower average scores.

SCORING TRENDS ANALYSIS:

Adelaide's last-5 average score is 89.0 points for and 74.2 points against, while their last-3 average score is 83.0 points for and 77.7 points against. Their attack and defence are trending stable. Gold Coast's last-5 average score is 71.8 points for and 101.6 points against, while their last-3 average score is 74.7 points for and 99.0 points against. Their attack and defence are also trending stable. Adelaide's scoring profile gives them an advantage due to their higher average scores.

HOME GROUND ADVANTAGE:

Adelaide has a 75% win rate at home this season, while Gold Coast has a 14% away win rate. At Adelaide Oval, Adelaide has a 59% win rate historically, while Gold Coast has a 0% win rate in their last 5 games. The estimated point value of home advantage for this match is around 12-15 points, based on the significant difference in win rates.

MARKET & MODEL ANALYSIS:

The head-to-head market implies a 73.5% chance of Adelaide winning, while the line market implies a 16.9-point margin in favour of Adelaide. The Squiggle model predicts a 13.4-point margin in favour of Adelaide. The market and model agree on Adelaide as the likely winner, with the model predicting a slightly lower margin.

FATIGUE & TRAVEL IMPACT:

Adelaide has 8 days of rest, while Gold Coast has 7 days of rest. Gold Coast has moderate travel from Gold Coast to Adelaide. Fatigue is not a significant factor for this match, given the similar rest days for both teams.

WEATHER IMPACT:

The forecast is for heavy rain and moderate wind. The conditions may favour Adelaide, as they have a more contested-style game, which can be less affected by the weather. However, the impact is likely to be neutral, as both teams will need to adapt to the conditions.

TEAM NEWS IMPACT:

Gold Coast's Ben Long is suspended for one game, which may have a minor impact on their team. However, the exact positional impact is unclear. No other significant team news is available.

CONFIDENCE: Medium

The data sources generally agree on Adelaide as the likely winner, but the margin is less certain due to the weather forecast and Gold Coast's potential to cause an upset.

UPSET RISK: Medium

Specific data points that support an upset include Gold Coast's historical record at Adelaide Oval (although they have not won in their last 5 games), their stable attack and defence trends, and the potential for the weather to reduce the margin. However, Adelaide's significant home ground advantage and recent form make an upset less likely.

DATA CONFLICTS: None identified

There are no significant conflicts between the data sources, with the market, model, and form data generally agreeing on Adelaide as the likely winner.

Round 18 | Docklands | 2026-07-12

Western Bulldogs vs West Coast

MEDIUM CONFIDENCE

TIP: Western Bulldogs

72% win probability approx. 28pt margin

Western Bulldogs \$1.12 (89.4% implied) | West Coast \$6.33 (15.8% implied) | Line: Western Bulldogs giving 36.5 pts

PREDICTED WINNER: Western Bulldogs

WIN PROBABILITY: Western Bulldogs: 72% | West Coast: 28%

The probability is derived from a weighted blend of the betting market (40%), Squiggle model (30%), and form data (30%), with the market's implied probability of 89.4% for Western Bulldogs being adjusted downward to account for the bookmaker's overround and the Squiggle model's expected margin of 33.4 points.

PREDICTED MARGIN: ~28 points

The predicted margin is anchored to the line market of 36.5 points and adjusted downward based on the Western Bulldogs' average margin of -12.0 points over the last 5 games and West Coast's average margin of -11.0 points over the last 5 games.

KEY FACTORS:

- The Western Bulldogs have a strong head-to-head record against West Coast, with a 75% win rate over the last 4 meetings and an average score of 119.5 vs 53.5.
- The Western Bulldogs have a home win rate of 57% this season, while West Coast has an away win rate of 12%, indicating a significant home ground advantage.
- The Western Bulldogs have an average score of 75.2 points for and 87.2 points against over the last 5 games, while West Coast has an average score of 73.4 points for and 84.4 points against over the last 5 games.
- The Squiggle model predicts a Western Bulldogs win with an expected margin of 33.4 points, which is consistent with the betting market's implied probability of 89.4% for Western Bulldogs.

SCORING TRENDS ANALYSIS:

The Western Bulldogs have averaged 75.2 points for and 87.2 points against over the last 5 games, with a stable attack and defence trend. Over the last 3 games, they have averaged 67.3 points for and 90.7 points against. West Coast has averaged 73.4 points for and 84.4 points against over the last 5 games, with a stable attack trend and a defence trend that is leaking more points. The Western Bulldogs' scoring profile gives them an advantage due to their higher average score over the last 5 games.

HOME GROUND ADVANTAGE:

The Western Bulldogs have a home win rate of 57% this season, while West Coast has an away win rate of 12%. At Docklands, the Western Bulldogs have a historical win rate of 53% and an average margin of +4.6 points, while West Coast has a historical win rate of 36% and an average margin of -15.5 points. The estimated point value of home advantage for this match is around 10-15 points.

MARKET & MODEL ANALYSIS:

The head-to-head market implies a Western Bulldogs win probability of 89.4%, while the line market implies a Western Bulldogs win by 36.5 points. The Squiggle model predicts a Western Bulldogs win with an expected margin of 33.4 points. The market and model are generally in agreement, with the Squiggle model's expected margin being slightly lower than the line market.

FATIGUE & TRAVEL IMPACT:

Both teams have had 9 days of rest, but West Coast has had to travel from Perth to Melbourne, which may be a fatigue factor. However, the impact of travel is likely to be minimal given the relatively long rest period.

WEATHER IMPACT:

The weather forecast is neutral, as the game is being played at Marvel Stadium, which has a roof. Therefore, the weather conditions will not affect the game.

TEAM NEWS IMPACT:

There is no significant team news available for either team, with the Western Bulldogs having overturned Mathew Kennedy's one-match suspension and West Coast having no relevant news in the last 7 days.

CONFIDENCE: Medium

The data sources generally agree on a Western Bulldogs win, but the margin of victory is uncertain due to the contradictory signals from the line market and the Squiggle model.

UPSET RISK: Low

The specific data points that support a low upset risk include the Western Bulldogs' strong head-to-head record against West Coast, their significant home ground advantage, and the Squiggle model's expected margin of 33.4 points.

DATA CONFLICTS: None identified

There are no significant data conflicts identified, as the market, model, and form data are generally in agreement on a Western Bulldogs win.

Round 18 | MCG | 2026-07-12

Melbourne vs Richmond

HIGH CONFIDENCE

TIP: Melbourne

78% win probability approx. 38pt margin

Melbourne \$1.09 (91.7% implied) | Richmond \$7.62 (13.1% implied) | Line: Melbourne Demons giving 41.5 pts

PREDICTED WINNER: Melbourne

WIN PROBABILITY: Melbourne: 78% | Richmond: 22%

The probability is derived from a weighted blend of the betting market (60% weight), Squiggle model (20% weight), and form data (20% weight), with the market's implied probability of 91.7% for Melbourne adjusted downward to account for the overround and potential biases in the market.

PREDICTED MARGIN: ~38 points

The predicted margin is anchored to the line market of 41.5 points and adjusted downward based on Melbourne's average margin of +4.4 points over the last 5 games and Richmond's average margin of -42.0 points over the last 5 games.

KEY FACTORS:

- 1. Melbourne's strong home ground advantage, with a 6/7 win rate at home this season and a 52% all-time win rate at the MCG.
- 2. Richmond's poor away record, with a 1/8 win rate away from home this season and a -16.0 point average margin over their last 5 games at the MCG.
- 3. Melbourne's stable attack and tightening defence, with an average score of 87.0 points for and 82.6 points against over the last 5 games.
- 4. Richmond's struggling attack and defence, with an average score of 65.6 points for and 107.6 points against over the last 5 games.

SCORING TRENDS ANALYSIS:

Melbourne's last-5 average is 87.0 points for and 82.6 points against, while their last-3 average is 94.0 points for and 73.0 points against. Their attack is stable, and their defence is trending downward. Richmond's last-5 average is 65.6 points for and 107.6 points against, while their last-3 average is 64.0 points for and 84.3 points against. Their attack and defence are both stable, but at a low level. Melbourne's scoring profile gives them an advantage due to their higher average score and tighter defence.

HOME GROUND ADVANTAGE:

Melbourne has a 6/7 win rate at home this season, while Richmond has a 1/8 win rate away from home. At the MCG, Melbourne has a 52% all-time win rate, while Richmond has a 53% all-time win rate. However, Melbourne's recent record at the MCG is stronger, with a 5/5 win rate over their last 5 games. The point value of home advantage for this match is estimated to be around 10-15 points.

MARKET & MODEL ANALYSIS:

The h2h market implies a 91.7% chance of Melbourne winning, while the line market implies a 41.5 point margin. The Squiggle model predicts a 35.6 point margin in favour of Melbourne. The market and model agree on Melbourne winning, but the model predicts a slightly lower margin. The market's implied probability is given more weight due to its reflection of the overall market consensus.

FATIGUE & TRAVEL IMPACT:

Both teams have 8 days of rest, and neither team has significant travel. Fatigue is not a real factor for this match.

WEATHER IMPACT:

The forecast is for a max of 14°C, with a 52% chance of rain and 23 km/h wind. The conditions may be slightly slippery, which could reduce kicking accuracy. However, the weather is not expected to significantly favour one team over the other.

TEAM NEWS IMPACT:

There is no relevant team news available for either team.

CONFIDENCE: High

The data sources generally agree on Melbourne's strong chances of winning, with the market, model, and form data all pointing to a Melbourne victory.

UPSET RISK: Low

The data points that support an upset are Richmond's occasional ability to push top teams, as seen in their recent game against Carlton, and the potential for Melbourne to be complacent given their strong record against Richmond. However, these factors are not sufficient to overcome Melbourne's significant advantages in this match.

DATA CONFLICTS: None identified

There are no significant contradictions between the data sources, with all pointing to a Melbourne victory.

Round 18 | Gabba | 2026-07-12

Brisbane Lions vs Essendon

HIGH CONFIDENCE

TIP: Brisbane Lions

85% win probability approx. 45pt margin

Brisbane Lions \$1.02 (98.2% implied) | Essendon \$16.45 (6.1% implied) | Line: Brisbane Lions giving 62.5 pts

PREDICTED WINNER: Brisbane Lions

WIN PROBABILITY: Brisbane Lions: 85% | Essendon: 15%

The win probability is derived from a weighted blend of the betting market (60% weight), Squiggle model (20% weight), and form data (20% weight), with the market's implied probability of 98.2% for Brisbane Lions adjusted downward to account for the bookmaker's overround and the potential for upsets. The Squiggle model's predicted win probability of 79.2% for Brisbane Lions and the team's strong form, with a 4-1 record in their last 5 games, also support this probability.

PREDICTED MARGIN: ~45 points

The predicted margin is anchored to the line market, which gives Brisbane Lions a 62.5-point advantage, and the scoring margin averages, with Brisbane Lions averaging a +21.2-point margin in their last 5 games and Essendon averaging a -32.2-point margin in their last 5 games. The strong form of Brisbane Lions and the poor form of Essendon justify a margin of around 45 points.

KEY FACTORS:

1. Brisbane Lions' strong recent form, with a 4-1 record in their last 5 games, including a 22-point win over Geelong and a 43-point win over Sydney.
2. Essendon's poor recent form, with a 0-5 record in their last 5 games, including a 67-point loss to St Kilda and a 45-point loss to Melbourne.
3. Brisbane Lions' strong home ground advantage, with a 57% win rate at the Gabba this season and a 61% win rate at the Gabba historically.
4. Essendon's poor away record, with a 0-8 record away from home this season and a 35% win rate at the Gabba historically.

SCORING TRENDS ANALYSIS:

Brisbane Lions' last-5 average is 109.6 points for and 88.4 points against, while their last-3 average is 121.3 points for and 88.0 points against. Their attack is trending up, while their defence is stable. Essendon's last-5 average is 57.4 points for and 89.6 points against, while their last-3 average is 55.0 points for and 97.0 points against. Their attack and defence are both stable. Brisbane Lions' scoring profile gives them an advantage due to their strong attack and stable defence.

HOME GROUND ADVANTAGE:

Brisbane Lions have a 57% win rate at home this season and a 61% win rate at the Gabba historically. Essendon have a 0-8 record away from home this season and a 35% win rate at the Gabba historically. The point value of home advantage for this match is estimated to be around 15-20 points, based on the historical data.

MARKET & MODEL ANALYSIS:

The head-to-head market implies a 98.2% chance of Brisbane Lions winning, while the line market implies a 62.5-point advantage for Brisbane Lions. The Squiggle model predicts a 50.6-point margin in favour of Brisbane Lions. The market and model agree on a Brisbane Lions win, with the model predicting a slightly lower margin than the market.

FATIGUE & TRAVEL IMPACT:

Brisbane Lions have 10 days of rest, while Essendon have 7 days of rest. Essendon also have to travel from Melbourne to Brisbane, which may cause some fatigue. However, the impact of fatigue is likely to be minimal, given the relatively short travel time and the fact that both teams have had a similar amount of rest.

WEATHER IMPACT:

The forecast is for fine conditions, with a maximum temperature of 21°C and a 16% chance of rain. The weather is unlikely to have a significant impact on the game, with both teams able to play their usual style.

TEAM NEWS IMPACT:

There is no confirmed team news available for this match. However, it is worth noting that Essendon's caretaker coach, Dean Solomon, has spoken about the need for his team to improve their effort and attitude, which may indicate some changes to their lineup or game plan.

CONFIDENCE: High

The data sources agree on a Brisbane Lions win, with the market, model, and form data all supporting a strong victory. The only potential concern is the possibility of an upset, but the data suggests that this is unlikely.

UPSET RISK: Low

The upset risk is low due to Brisbane Lions' strong form, Essendon's poor form, and the home ground advantage. The only specific data point that could support an upset is Essendon's ability to cause an upset in their last meeting with Brisbane Lions, but this is unlikely to happen given the current form of both teams.

DATA CONFLICTS: None identified

There are no cases where two data sources give contradictory signals. The market, model, and form data all agree on a Brisbane Lions win, with the only potential conflict being the possibility of an upset, which is considered low.
